

TITLE: Adjustable Handgrip
INVENTOR: Adam Matthew Holms
Docket No.: 04HOLM1

ABSTRACT

An adjustable wrapping device comprising a flexible sheet of a compressible elastomer laminated to a sheet of a reinforcing fabric to form a laminated sheet. The sheet of compressible elastomer has an upper and lower surface wherein at least one of the surfaces is textured. A colored fabric is preferably affixed to at least one peripheral edge of the laminated sheet. The adjustable wrapping device further includes means for releasably attaching an upper edge portion of the laminated sheet to a lower opposing edge portion of the laminated sheet to enable the device to be formed into a cylindrical structure.
